DEADLINE

Deadline for the next issue of *Today & Tomorrow,* which will cover the period March 15-28, will be Tuesday Mar. 4, 11 a.m. Please send your copy to Allen Balderson, News Services Dept., 1475-4th Ave., x2557.

A scientific symposium on "Atherosclerotic Heart Disease: Concepts from Cell Biology" will highlight the dedication of the J. David Gladstone Foundation Laboratories for Cardiovascular Disease, on Monday, March 31. The Laboratories are affiliated with UCSF School of Medicine and located at SFGH.

The symposium, to be held from 2 to 4 p.m. in Carr Auditorium at SFGH, will present Christian deDuve, Nobel laureate and professor of biochemical cytology at Rockefeller University; Joseph L. Goldstein, chairman of Molecular Genetics Department at the University of Texas at Dallas; and Robert W. Mahley, director of the Gladstone Foundation Laboratories and UCSF professor of Pathology.

A dedication ceremony will be held at 11 a.m. in the main hospital lobby at SFGH, followed by a tour of the Laboratories and a buffet luncheon. City, University and SFGH officials will participate in the dedication along with trustees of the Gladstone Foundation. The ceremony will be chaired by Dean Krevans of the School of Medicine.

In the evening, Chancellor Sooy and CVRI Director Richard J. Havel will host a reception at University House on campus, followed by an invitational dinner hosted by Mahley and the trustees of the Foundation, Richard S. Brawerman, Richard D. Jones, and David Orgell.

The Gladstone Foundation Laboratories were established through a provision in the estate of the late Los Angeles businessman J. David Gladstone.

NEWS BRIEFS

UC President David Saxon in a report to the Regents stated that the University is studying the possible impact of Proposition 9 (Jarvis II). The Proposition halves income tax and, if passed, could reduce state revenues as much as $5 billion.

Saxon declared that it is too soon to assess the exact effect of the Proposition, but it could make as much as a 30% cut in the amount of state revenue available to support the University and poses a real threat to the quality of the institution. It probably would require the initiation of substantial tuition fees for all students, not only at UC, but at all public higher education institutions.

This would have a negative impact on re-enrollment and on the ability of the children of the middle class, the poor, and minority groups to gain a higher education, he declared.

An oil portrait of Edward B. Shaw, emeritus professor of Pediatrics was unveiled at a reception in November 1979 and is now on permanent display in the Department of Pediatrics, sixth floor of Moffitt Hospital.

The Edward B. Shaw Portrait Committee, comprised of John C. Piel, a prominent pediatrician (chairman), Bruce O. Berg, director of Child Neurology, and Joseph H. Kushner, clinical professor of Pediatrics, presented the portrait to Chancellor Sooy to commemorate Shaw's long and distinguished career in Pediatrics. A 1923 UCSF alumnus, Shaw has been on the UCSF faculty since 1925. The portrait artist is Barnaby Conrad.

Children born to parents with allergies probably will become allergic themselves, most likely following the onset of a minor virus infection like the common cold, according to studies by Oscar Frick, professor of Pediatrics, and John Mills, assistant professor of Medicine and chief of Infectious Diseases at SFGH. The studies were reported to the American Academy of Allergy in late February.

The first study was for five years and involved 13 children born into families in which both parents suffered from hay fever, eczema, asthma, and other allergic conditions. Three-quarters of these children showed their first allergic symptoms after the onset of a viral respiratory infection. The study has now been expanded to 27 children.

The link between the virus infection and subsequent allergic reactions among the children studied was established by blood tests which showed that the antibody IgE - a type typical in allergy sufferers - was at significantly higher levels following a minor infection than before infection.

How to get medical and pharmaceutical papers published is a major topic of a seminar sponsored by the Northern California chapter of the American Medical Writers Association, May 12-15, in Asilomar, Calif.

The seminar will provide the opportunity for stimulating exchanges among editors, biomedical researchers, authors/writers, and publishers. Scheduled speakers include Stephen Lock, the editor of *British Medical Journal*.

For further information and a detailed brochure contact Donna Alvarado, Department of Neurosurgery Editorial Office, x3272.

"Rehabilitation of the Cancer Patient: Strategies for Physical, Occupational and Speech Therapists," is the topic of a symposium sponsored by the Northern California Cancer Program on Friday and Saturday, March 21 and 22.

The conference is designed to provide cancer rehabilitation skills to therapists by utilizing a variety of experienced oncology therapists and other health professionals and patients as speakers.

Continuing education credit for physical therapists and assistants is available. For further information contact Carrie Ewing, 497-7431.

Geoffrey N. Lang has been appointed executive administrator, SFGH, following a nationwide search. Lang, 38, has been on the administrative staff of the Harborview Medical Center, Seattle, Washington, since 1969 and has served as its associate administrator since 1971. Harborview is a county-owned, university-managed teaching hospital.

Lang is a native of San Rafael, and earned his MPH and BS in Public Health at UC-Berkeley. He is the president-elect of the UC Hospital Administration Alumni Association.

William B. Kerr, director of Hospitals and Clinics, will continue to serve as acting executive administrator at SFGH, until Lang arrives in May.

A two-day symposium on advances in pediatric nursing will be held at S.F.'s Mark Hopkins Hotel, Thursday and Friday, March 13 and 14.

Sponsored by Continuing Education in Nursing, the symposium will focus on clinical advances in ambulatory and acute care pediatric nursing practice. Some of the issues to be discussed are: pediatric morbidity, including cancer, cardiac disease, and renal disease; new prevention techniques for childhood behavior problems; providing comprehensive health care to school-age children, and understanding psychosocial aspects of Asian families.

One university extension credit of 12 hours is offered for $100. For registration information call x2894 or x2483. For program information call x1817.

Applications are being sought for the 1981-83 California Policy Seminar Research Awards. Faculty and researchers on all UC campuses and associated federal laboratories who are investigating public policy issues on subjects of vital concern to Californians are eligible.

The applicant must submit a short description of the issue to be researched. Past policy issues have included energy constraints, housing, care for the elderly, toxic chemicals, and changing life styles. Four to six of the papers will be chosen for a two-year, $50,000 funding beginning July 1, 1981.

Application forms may be obtained from the California Policy Seminar, 109 Moses Hall, UC-Berkeley, 94720, or by calling 8-582-5514. Application deadline is April 1, 1980.

Initial funding awards will be announced on or about June 30, 1980.
